www.andriuss.lt

Full-stack developer with 7+ years of experience in PHP, JavaScript, and modern frameworks. Skilled in building scalable e-commerce and CMS solutions, optimising backend performance, developing responsive frontends, and automating workflows. Experienced in remote work and collaborating with multicultural teams to align technical solutions with business needs.

WORK EXPERIENCE

Senior Backend Developer / Fixed-Term Contract
Oct 2024 - Nov 2024
383Project / Birmingham, UK (Remote)

383 Project is a digital product studio creating UX, content strategy, and platform solutions for brands like Worcester Bosch and Volkswagen.

- Collaborated with the engineering team to build a user-focused platform within the Shopify Plus ecosystem that handles up to 100k users.
- Prepared project dataflows in Miro based on specifications.
- Contributed to web app development using Hydrogen/Remix/Sanity.

Full-Stack Web Developer
Feb 2019 - May 2024
Gloss Ltd / Birmingham, UK (Hybrid)

Gloss is an international marketing agency with 60+ employees, its services covered 300+ web projects and 1000+ customers in total.

- Managed technical operations, 10 WHMs and 300+ cPanel accounts.
- Planned sitemaps, dataflows, and project structures.
- Handled end-to-end WordPress, Shopify project lifecycle.
- Developed custom WordPress plugins and integrated page builders.
- Converted mockups into responsive layouts and optimised code.
- Mentored junior developers and provided technical support.
- Prepared documentation for customers.

Full-Stack Developer
Apr 2018 - Present
Andriuss.lt / Self-employed (Remote)

Delivered custom web solutions for 50+ clients, addressing technical challenges and ensuring scalable projects.

- Configured DNS, prepared emails and hosting for web projects.
- Debugged multiple JavaScript, PHP, and CSS related issues.
- Migrated and mapped small projects data across platforms.
- Developed customised WordPress websites and plugins.
- Integrated APIs and automated management processes.
